Advancing Sustainability through Well-Being

Message from the Guest Editors

We live in a world where sustainability is being called for on numerous stages. From the recent social unrest in the USA, borne of racial injustice, to the outcomes and implications of a global pandemic, our collective well-being is being challenged on every level. A shift in the way we relate to the planet is needed. Science can be used as a tool not to control our future, but to recognize, catalyze, and support natural processes unfolding in front of us each day for an improved quality of life for *all* beings. We seek to collate a diverse collection of academic works linking (m)any of the multiple dimensions of well-being (physical, mental, emotional, subjective, social, spiritual, sexual, environmental, non-human, multi-dimensional, etc.) and sustainability. We welcome original research papers that may be grounded in empirical work, but also those that engage with alternative theories and frameworks. Non-typical works and authors are also welcomed, including those in racial and social justice platforms, the arts, spirituality, indigenous and traditional ecological knowledge, approaches to regeneration, death, grief, sexuality...

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
