

Topical Collection

Circular Economy Approaches for Lifecycles of Products and Services

Message from the Collection Editors

The CIRC4Life project develops three circular economy business models (CEBMs): the co-creation of products and services, sustainable consumption, and collaborative recycling/reuse. In order to further develop and implement circular economy approaches and sustainability, to share the CIRC4Life project achievements and to promote the research outcome in the research areas, this Topical Collection calls for papers focused on, but not limited to, the following topics: - Circular economy and sustainability methods/technologies - Circular economy and sustainability implementation - Development and support for circular economy and sustainability

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
