Special Issue

Developing 5G/6G Wireless Technologies for Sustainable Communication Systems

Message from the Guest Editors

This Special Issue encourages researchers to present original and recent developments in fundamental theory, performance limits, design, management issues, and challenges and promising solutions for sustainable 5G and 6G communication systems. Topics of interest include but are not limited to the following areas:

- Energy-aware design of 5G/6G transmissions and communication systems;
- Wireless energy transfers and energy harvesting for sustainable 5G/6G systems;
- Potential 5G/6G applications toward sustainable development growth;
- Transdisciplinary approaches toward sustainable 5G/6G developments and implementations;
- Application of information theory to the 5G/6G communication systems;
- Big data and edge Al technology as enablers for 5G/6G communication systems:
- Novel interference solutions and resource controls for 5G/6G communication systems;
- Cell-free massive MIMO for 5G/6G communication systems;
- Propagation modeling on millimeter waves and terahertz spectrum;
- High intelligence versus privacy and complexity;
- Three-dimensional integrated communications;
- Ultra-reliable low-latency communications;
- Security and reliability issues with 6G/IoT.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
