

## Special Issue

# Sustainable International Management: Research in Global Culture and Leadership Development

### Message from the Guest Editors

The goal of the Special Issue is to expand the existing literature on these themes by offering new insights and future perspectives on how informal institutions (e.g., changing cultural values and cultural practices) and formal institutions (e.g., regulations, norms) may interplay together and affect corporate sustainability performance, as well as what the role is of leadership in shaping corporate sustainability policies and practices. We invite both conceptual and empirical research on the above themes. We are particularly interested in research combining multiple theoretical backgrounds and methodological approaches, as well as literature review or theory papers.
