

Special Issue

Sustainability and Degrowth— Theoretical Challenges and Empirical Evidence

Message from the Guest Editor

Our aim for this Special Issue is to contribute to the discussions concerning the ways in which organizations and society may disengage from the uncritical adherence and strong dependency on putative economic growth. The consequences of this blind pursuit of growth have been ecological, and economic crises have also become the everyday condition of our lives. Yet, inhabitants of big cities face daily problems with pollution, violence, and psychological stress. At the same time, organizational and management scholars have been accused of not paying due attention to the questions which really matter in society. We invite scholars to present papers discussing new ways of organizing and solving contemporary societal problems. We invite papers that critically address the role of organizations and institutions in maintaining the status quo of economic growth. We invite papers dealing with new experiments and new forms of organizing which address societal problems linked to Sustainability and Degrowth in the Global South.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
