

## Special Issue

# Sustainability in Protected Crops

### Message from the Guest Editor

Extreme weather conditions and the reduction in the quantity and quality of available resources threaten the sustainability of agricultural production and the resilience of farms. However, the importance of this sector is key for society, as has been demonstrated in the recent health crisis caused by COVID-19.

Greenhouse cultivation is the most intensive form of plant production in terms of production yield, investment, and inputs. This Special Issue includes empirical articles that analyze sustainability along the agri-food value chain for greenhouse products from economic, environmental, and social points of view. Particular consideration is given (but not limited) to empirical articles that analyze the contribution to the sustainability of new applications in market price analysis, studies of costs, economic, environmental, and social water, energy and raw material use efficiency, circular economy, precision agriculture, smart farming, nutrients and waste management, life cycle analysis, production, storage and/or consumption of energy, renewable energy, and bioenergy.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
