

Special Issue

Sustainability Psychology and Behavioural Change

Message from the Guest Editor

There is ample literature on the effectiveness of behavioural change strategies in health psychology, a comprehensive investigation of these strategies to promote sustainability is missing. Therefore, this Special Issue aims to supplement existing literature with an insight into the latest findings on behavioural change and the role of psychological processes to move societies towards a more sustainable future. The Special Issue welcomes papers from all areas of behavioural change initiatives promoting sustainability: household energy consumption, food waste, travelling, mobility, recycling, sufficiency, consumer good consumption, investment decisions, food choices, behavior change, intervention strategies, etc. The papers of this Special Issue should provide insights for academics and practitioners alike in how to design effective interventions to promote sustainable behavioural change.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits
