

Special Issue

Enabling Sustainable IoT toward State-of-the-Art Technologies

Message from the Guest Editors

The purpose of the special issue is to explore the State-of-the-Art technologies for enabling sustainable IoT. In addition to the technological sustainability of IoT, it is also very important to comprehend how IoT sustainability may be embedded in people's use of IoT technologies. Particularly considering the importance of mHealth technologies under the socially distanced circumstances caused by COVID-19, thorough investigation of people's diverse uses of those technologies is necessary for further understanding the sustainability of IoT. Therefore, we encourage research into covering IoT systems for wireless sensing, healthcare devices, energy harvesting including both hardware and software and their applications including digital healthcare, biophotonics, civil engineering, and power optimization. Research on diverse issues related to mHealth technologies will also be welcomed.

Guest Editors

Prof. Sehwan Kim

Department of Biomedical Engineering, College of Medicine, Vice Director, Beckman Laser Institute Korea, Dankook University, Korea (ROK)

Prof. Dr. Jaehee Cho

School of Communication, Sogang University, Seoul, Korea

Dr. Aatmesh Shrivastava

Department of Electrical and Computer Engineering, Northeastern University, Boston, MA 02115, USA

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
