Special Issue

Sustainable Agricultural Economics and Policy

Message from the Guest Editors

Sustainable agriculture is growing day by day with the aim to produce food and energy in a sustainable way for the growing human population and to support inclusive growth and development. By 2050, the world's population will reach 9.1 billion, 34 percent higher than today. Food production must increase in line with the sustainability goals. Agricultural policy could play a strategic role, but it is important to outline that sustainable agriculture is influenced by a host of social, economic, and environmental factors.

This Special Issue is aimed at soliciting original contributions from academics and researchers providing theoretical insights and/or empirical analysis, which address socioeconomic and/or environmental dimensions of sustainable agriculture, sustainable economics, and agricultural policy that can provide valuable lessons for the future. We encourage submissions from allied areas, business, economic sustainability, entrepreneurship and business sustainability, green marketing, industry and sustainability, etc. The scope of submission includes original research and review articles that address the issues raised above.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
