

Special Issue

Sustainable Career Development

Message from the Guest Editors

Sustainable career development represents a new interdisciplinary research area in the field of psychology, counseling and career guidance. A sustainable career includes sufficient economic security, matching the individual's career with their values, adapting to the evolving changes of individuals' needs and interests, and renewal opportunities (McDonald and Hite, 2018). Sustainable careers consist of a set of opportunities for integration across individuals' life spheres and experiences that create a sense of wholeness, completeness and meaning. This Special Issue is focused on the contribution that sustainable career development may add to the broader theme of sustainability and sustainable development, as manifested during psychological, counseling and social interventions. Hence, the aim of the present issue is to explore the topic of sustainable career development in relation to psychological, counseling and social implications. The Special Issue will seek to collect and present innovative theoretical contributions, practical reflections for practitioners and the results of empirical research on this topic.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada
