

Special Issue

Sustainable Construction and Development

Message from the Guest Editor

Complexities of sustainable construction and development have to be studied, including the challenges, importance, and impact on the performance of functions. Furthermore, innovation, professionalism, ethics, culture, and procurement practices and regulations should be addressed.

In this Special Issue, we invite contributions to the obligations and actions that play a role in the concept and practice of sustainability in construction and development and that explore the need for environmental, economic, and social sustainability, and the implications for the construction industry.

Guest Editor

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
