

Special Issue

Sustainable Construction Management

Message from the Guest Editor

Sustainable construction management (SCM) is a platform for sustainable and green construction practices. Two key aspects of SCM are resource efficiency and ecological principles. Sustainable building practices have experienced significant growth, while the awareness of global warming and other environmental issues has gained momentum. Despite indications of significant growth, SCM has not been without challenges and barriers, the most common of which is the premium cost over conventional practices. However, the cost of SCM could be minimized or eliminated through improving the level of communication across the project team, inclusive design charrette processes for project stakeholders, and effective front end planning.

This Special Issue will provide an opportunity for researchers to exchange new ideas across the emerging field. The goal of this Special Issue is to collect high-quality contributions to address the sustainable construction management advancements and best practices.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
