

Special Issue

Sustainable Decision Making

Message from the Guest Editors

Sustainable decision making arising from the inclusion of stakeholders in the decision-making process can therefore be supported by a number of approaches providing the right information to the right people at the right time. This Special Issue offers a platform with which to identify new trends, developments and applications of sustainable decision making.

The objectives of this Special Issue are to provide a thorough analysis of the status, potential, challenges, and recent developments of approaches for supporting the decision process and to explore the issues around new ideas. We invite researchers and experts to submit original research and review articles that can describe innovative processes with evidence of successful application. Manuscripts based on integrated and interdisciplinary approaches, theoretical discussions to encourage community dialogue and participation, the links between sustainability decision making and digital innovation, and the adaptation of approaches from other fields to support wider participation in decision making are particularly welcome.

- decision making
- decision support tools
- stakeholder
- participation

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada
