

Special Issue

Sustainable Development in the Shadow of the COVID-19 Pandemic: Economic, Environmental, and Health Perspectives

Message from the Guest Editors

The purpose of this Special Issue is to stimulate, promote, and gather research at the intersection between these issues. We are particularly interested in contributions exploring the following topics (but also in works addressing other related topics):

- Short- and long-term macroeconomic consequences of infectious diseases;
- Short- and long-term environmental implications of infectious diseases;
- Mutual relationships between economic, environmental, and health outcomes;
- Effects of public policy on economy, environment, and health;
- Role of public (health, economic, and environmental) policy in promoting a sustainable development;
- Demographic and social aspects of the economy–environment–health relationship

Both theoretical and empirical (current and historical) contributions are welcome for this Special Issue. Works relying on economic, epidemiological, or environmental management approaches are welcome, and those integrating them from a multi-disciplinary perspective are particularly encouraged. We look forward to your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
