

Special Issue

Advances in Sustainable Development Goals (SDGs) and Socio-Economic Systems for Local Communities

Message from the Guest Editors

It is more indispensable and urgent than ever to achieve the 2030 global Agenda for Sustainable Development Goals (SDGs) by United Nations and to re-build a more sustainable and inclusive socio-economic system for human societies on both the local and global scales (UN Compact and DNV-GL, 2020). Based on this recognition, this Special Issue will highlight how the socio-economic system, including business and finance, is built and works for local communities to achieve Sustainable Development Goals (SDGs) not only by theoretical or methodological approaches, but also by a case studies approach. This Special Issue is to address the socio-economic system and to target collective efforts for transition to achieving SDGs in a post-COVID-19 world. Possible paper topics include but are not limited to: social business; social entrepreneurship; green bonds; environmental, social, and governance (ESG); socially responsible investing (SRI); impact investing; impact evaluation, crowdfunding; Sustainable Development Goals (SDGs); venture capital, business angels; information technology service (ITS); sustainable consumption and production; low carbon energy; climate change.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
