

Special Issue

Sustainable Development, Climate Change, and Green Finance in a Changing World

Message from the Guest Editors

Since the Paris agreement, countries worldwide are implementing policies to reduce CO2 emissions and limit increases in global temperature. Climate finance has been one of the growing concerns of the world climate summit. All this comes with a crucial condition: re-aligning the financial system to increase the availability of finances to be used in environmental investments without compromising regional financial security. The main interest of this Special Issue is in contributions addressing the causal relationship between energy and financial markets, we will also consider submissions addressing related topics that examine the effects of financial markets and energy dynamics on: - The development, adoption, and expansion of more environmentally friendly energy sources;- Government policies and reforms related to renewable and alternative energy; - Climate change; - Mitigation and/or adaptation efforts/objectives; - Countries development strategies; - Geopolitical, institutional, international relations, and legal aspects of the increased usage of renewable energy sources.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
