

Special Issue

Sustainable Development and Knowledge Economy

Message from the Guest Editor

In this Special Issue, we seek to have papers which relate the main goal of humanity in current times (Sustainable Development—SD) with the main factor that has to be addressed in order to achieve that goal (Knowledge Management—KM). We assume that knowledge is the main tool humanity will have to use in order to achieve sustainable development. From that idea follows that knowledge management is the main activity to be performed in order to achieve sustainable development. As a very vivid example, we may signal that the current COVID-19 crisis, which is putting the planet's sustainability into question, is a problem of lack of knowledge (the vaccine) and of knowledge management (we do not know how to behave in order to fight the virus even if we have new data everyday).

Therefore, in this Special Issue, we welcome papers which relate to knowledge management and sustainable development including, but not limited to, the following topics: Theoretical analysis of the relation between SD and KM. Case studies of organizations. Sectorial analysis. Country studies and policy analysis. Prospective analysis.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
