

Topical Collection

Sustainable E-commerce

Message from the Collection Editor

The pandemic and the resulting restrictions on shopping have contributed to the dynamic growth of e-commerce. The explosive growth of the e-commerce sector raises the question of its role in the sustainable development. While the concept of sustainability itself is well recognized in the literature, including in many industry and functional contexts, sustainability in the context of e-commerce has been studied extremely rarely. The aim of the Special Issue is to create a discussion platform focused on opinions, ideas, and approaches in sustainable (social, environmental and economic) e-commerce and new emerging solutions and technologies that might be successfully applied in e-commerce. Both theoretical and practical studies in the area are welcome, especially innovative methods, tools, technologies, instruments in management, and case studies from different sectors and different countries.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
