

Special Issue

Sustainable Entrepreneurship, Firm Performance and Innovation

Message from the Guest Editors

This Special Issue will bring together a collection of works that collectively contribute to a better understanding of the challenges that sustainability and climate change pose to firms. All firms, large or small, young or established, public or private, are confronted by the subject of sustainability and its impact on their performance and innovation. Society increasingly expects firms to lead on sustainability practices, mitigate environmental impact, and navigate climate change. The purpose of this Special Issue is to promote theoretical and empirical research on sustainable entrepreneurship, firm performance, and innovation in order to better understand the connections between entrepreneurship, sustainability, innovation, and financial and non-financial forms of firm performance. We encourage submissions that systematically examine existing literature, provide empirical tests of new and existing theories, or develop thought-provoking agendas for future research.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
