

Special Issue

Sustainable Farming through Building Soil Health and Climate-Smart Innovations

Message from the Guest Editors

In the context of a changing climate, dwindling natural resources, and increasing social and economic inequalities, concerns for healthier and sustainable food systems have been gaining momentum, particularly as scientific evidence becomes more available. There is limited evidence on the types of innovation, technologies, practices, and policy incentives required to promote and institutionalize climate-smart sustainable farming principles, which should be tailored to differing farming systems. This Special Issue will focus on recent advancements, innovations, and practices that could enhance sustainable farming, with a particular focus on the following areas:

- Multi-functional landscapes that meet environmental, economic, and social goals;
- Innovations in sustainability and resilience practices for farming systems in marginal areas;
- Climate-smart agricultural practices for managing changing climates;
- Soil-carbon enhancement strategies and management practices;
- Soil nutrient and contaminant management;
- Innovation for last-mile delivery of climate-smart innovations.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
