

Special Issue

Quality and Innovation for a Circular Economy and a Sustainable Future

Message from the Guest Editors

The new economic environment requires, not only a change in production systems, but also a cultural change, with innovation and quality being the foundations for a new management model. The development of sustainable organizations and, above all, the creation of business networks for the realization of sustainable values represent an important opportunity to design new business models, where sustainability, innovation, quality, and respect for the consumer can work together in a perfect synergy, based on an approach that can be related to the concept of Circular Economy. This is a significant set of research topics for the scientific community.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
