

## Special Issue

# Sustainable Logistics and Supply Chain Management in the Aspect of Globalization

### Message from the Guest Editors

Recently, there has been growing interest in the application of sustainability issues in supply chain management, logistics, transportation and various optimization models (Seuring and Müller 2008). Supply chain management constantly faces many challenges and one of them is to operate in a sustainable manner. In this Special Issue, our aim is to explore the application of sustainability in supply chain management, operation management, logistics, transportation, healthcare management and fuzzy sets theory. We invite researchers from various fields of management to consider original and high-quality research papers that report mainly on sustainability-management-related issues that would contribute to fulfilling the aim of this Special Issue. Manuscripts in this Special Issue will focus on both theoretical and empirical studies.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
