

Special Issue

Sustainable Materials Science and Resource-efficient Processing Technologies

Message from the Guest Editor

Material and product life cycles are based on complex value chains of technology-specific elements. Essential and strategic raw materials have a direct impact on the sustainable success of applications based on new functionalized materials. Resource-efficient processing technologies and the development of (multi-)functional materials utilized as building blocks in future products are an urgent challenge of modern materials science. In order to create awareness and discuss these challenges, this Special Issue will contain solutions provided by materials research, enhanced processing technologies as well as best-practice examples and guidelines on how to obtain information about the supply risk and environmental aspects of resource utilization, especially at an early stage of basic research.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
