

Special Issue

Sustainable Mobile Learning and Learning Analytics

Message from the Guest Editors

The evaluation of mobile learning remains an open research issue, especially regarding activities outside the classroom. One of the main challenges in the field of technology-enhanced learning is the recognition of the activities and contexts of learners. Learning analytics are driven by the collection and analysis of traces that learners leave behind. Indeed, learning analytics can be served in every feature phone via SMS notifications or in powerful smartphones via richer visualizations or statistics. It can help to elucidate and optimize the learning process and the environments in which it occurs. To date, learning analytics has mostly been fed back to users through web-based learning dashboards. In this context, learning analytics can provide answers and offer the appropriate tools for enhancing mobile learning experiences. In this issue, we invite studies using learning analytics techniques to support educational decision making designed by extending the results of well-established studies in this field to deal with the complexity of mobile learning.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
