

Special Issue

Towards Sustainable Development of National and Supranational Systems—Political and Legal Challenges

Message from the Guest Editors

We would like to devote the proposed Special Issue to the problem of sustainable development explained from a system perspective. The authors of individual parts of the study examine the state of the system, its dynamics and directions of change relevant to the implementation of the principles of sustainable development in various areas of political and social life at the state and nonstate level. By taking into account such areas as the institutional and legal system (international and state structures), development of urban spaces, electoral systems of EU countries, and local government systems and international cooperation in selected areas, we want to show that the challenges of sustainable development are heterogeneous and complex, and thus, limiting them to the purely environmental aspect of the analysis is too restrictive and does not allow their comprehensive understanding and implementation. More details at: https://www.mdpi.com/journal/sustainability/special_issues/sustainable_national_supranational

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
