

Special Issue

Sustainable Product Development Management

Message from the Guest Editors

The development of sustainable products can be defined as the practice in which environmental issues are integrated into the product development process. The objective of developing sustainable products is to meet the needs of consumers in relation to durable, reusable, and remanufacturable products, since these aspects of the product life cycle are increasingly becoming a worldwide trend. For this Special Issue titled “Sustainable Product Development Management”, we invite the submission of articles that foster discussion on the design and development of sustainable products and integrated solutions of products and services that will contribute to the social, environmental, and economic sustainability of societies and territories, developing and applying process, models, methods for sustainable product and service innovation, and systems innovation for transition to sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
