

Special Issue

Sustainable Public Health and Human Safety

Message from the Guest Editors

Goal number 3 of the Sustainable Development Goals defined by the United Nations is to “Ensure healthy lives and promote well-being for all at all ages”. Indeed, as we experienced during the recent COVID-19 pandemic, ensuring healthy lives and promoting wellbeing is a crucial challenge for a sustainable development of our societies. The implementation of this issue can be declined in many ways: guaranteeing access to medical care, fighting against communicable and non-communicable diseases, and strengthening the prevention of substance abuse are only some of the options. The COVID-19 pandemic has tested the resilience of public health worldwide, reinforcing awareness of the importance of prevention strategies. Prevention is paramount to improve our health, embracing a large variety of interventions that may considerably reduce efforts and resources. Sustainable public health and human safety may be explored in terms of strategies to support i) behavior change, ii) the improvement of both living and working environments, and iii) the most vulnerable groups.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
