# **Special Issue**

# Sustainable River Water Resource Assessment, Modelling and Protection

# Message from the Guest Editors

In the modern changing world, the assessment of water resources is still as important as it was in the past. The available methods are more advanced due to the development of information technology, data collection techniques and data analysis concepts. However, this development only maintains the growing awareness of water scarcity and the need for protection. Due to the new changes, new inventions, concepts and ideas are necessary to sustainably manage such valuable resources as rivers and, in general, water systems. The purpose of this Special Issue is to present modern approaches to the assessment of river water resources from different perspectives. Interesting concepts for the protection and sustainable management of these limited goods can be discussed in the frame of this Special Issue. In the modern world, complex problems are solved with complex and advanced methods. Hence, models and modeling concepts applied in the area of river water resource assessment are welcomed.

# **About the Journal**

# Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

### **Author Benefits**

# Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

# **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
