Recent Advances in Sustainable Soil Use, Land Management and Soil Conservation

Message from the Guest Editors

Sustainable soil is the key to environmental sustainability. It is determined by the properties of the soil as well as the types and degree of anthropogenic impact on the soil. The importance of the rational use of soils their protection from all types of degradation increases with the growth of the Earth's population and global warming. Some of these problems are often discussed in scientific articles. However, some of the acute problems such as soil stability in the modern era under changing climate, the role of soil cover in the cities, formation of the stability of the urban environment, elements of biological farming aimed to obtain safe products, preserve soils by decreasing chemical loads to increase the fertility and plant protection requires careful scientific attention and broader coverage of them in research publications.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
