Special Issue

Sustainable Supply Chains

Message from the Guest Editor

In recent years, the notion of sustianable supply chain has been part of major corporations' core strategy. This Special Issue focuses on environmental sustainability in supply chains. Environmental practices taking place in supply chains include the following topics: The corporate approaches to climate change risk.

- · The measurement and management of reputational risk
- · Environmental purchasing practices.
- · Green logistics and transportation
- · The greening of products including the application of life cycle assessment or material substitution.
- The implementation and management of zero-waste-to-landfill policies in corporations.
- · The adoption of recycling systems and waste-toenergy technologies as well as the notion of closed-loop supply chain management.
- \cdot Water management and conservation in supply chains.
- · Energy efficiency in buildings or in energy-intensive processes.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
