Sustainable Tourism Development and Destination Marketing in a Post-pandemic Era

Message from the Guest Editors

The COVID-19 pandemic is a wake-up call for re-thinking the relationship between tourism development and sustainability. While international tourist arrivals declined by about 1 billion or 73 percent in 2020, we also witnessed how nature is healing from damages caused by overtourism and other human actions. As this pandemic has shaped a “new normal” for us, the tourism and hospitality industries seek innovations and new methods for a greener and smarter recovery in order to build a more resilient and sustainable tourism destinations. From a managerial perspective, the pandemic is an opportunity to design specific policies and destination marketing strategies that stimulate and promote tourists’ pro-environmental behaviors and sustainable practices of tourism and hospitality industries. Therefore, this Special Issue calls researchers to address the critical issues of rebuilding more sustainable tourism destinations and developing green marketing strategies in a post-pandemic era.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
