

Special Issue

Sustainable Tourism: Risks and Management

Message from the Guest Editors

For this Special Issue, we invite our colleagues to bring together a set of relevant research that reports and highlights practical and successful situations (or cases) in order to inform and teach managers and decision makers the good response practices that are being adopted worldwide in this new context. All types of approaches (interviews or surveys) are welcome for this Special Issue. We are looking for research works mainly in the following areas: marketing, tourism and management. We seek to promote and to bring together works that can present new business models, new management practices, as how to reassure shop buyers or even how to receive a client for tourism in this new era. We are interested in research articles, conceptual articles, review articles, and commentaries covering the whole breadth of sustainability concerns linked to digital services. The focus of this Special Issue is on digital services by sharing and explaining digital tools, products, services, persons, and/or interactions. The scope and the purpose of the Special Issue are linked: to allow managers to learn how to digitally manage their businesses.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
