Special Issue

Sustainable Urban Development

Message from the Guest Editor

At the start of the 21st century, humanity is a predominantly urban species. This special issue is about the future of cities and how urbanisation will develop when based on principles of sustainability. It explores the underlying dimensions of the transformation of existing cities and the design of low carbon green precincts and their urban systems. The view of the papers presented in this special issue are holistic and take questions of social sustainability into account. The aim is to define a new agenda of change for sustainable urban development that can be transferred and replicated in other cities: urban solutions and success stories (case studies) to ensure we are all aware of the possibilities towards 'the urban future we want'.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
