

Special Issue

Transitions to Sustainable Urban Mobility in Global South Cities: Challenges, Innovations and Opportunities

Message from the Guest Editors

This Special Issue intends to bring together new and emerging interdisciplinary research that explores current trajectories, practices and drivers of sustainable and inclusive transport and land use development in growing cities in Latin America and the Caribbean, Africa and South-East Asia. In a context of rapid urbanisation and economic growth, increasing access to new technologies, and shifts in paradigms of individual and collective mobility, new challenges and opportunities are emerging for global south cities in relation to how to plan, govern and regulate urban transport systems. Such challenges represent a new area of research on sustainable mobility, requiring new conceptual and methodological developments, as well as yielding new empirical evidence of new travel behaviours, perceptions and priorities of increasingly connected citizens and the potential social consequences of inequalities in terms of access to new transport alternatives and technologies. For further reading, please visit the [Special Issue Website](#)

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
