

Special Issue

Advances in Sustainable Utilization and Optimal Decision of Land Resources

Message from the Guest Editors

With rapid socioeconomic development and increasing urbanization, land resources have borne increasing pressure from multiple stakeholders, which accelerates land use competition and conflicts. The optimal utilization of land resources needs to take into account multiple aspects of land systems and interactions with other physical and socioeconomic systems (e.g., ecosystem, climatic system, and human activities). This Special Issue aims to present recent advances in the Sustainable Utilization and Optimal Decision of Land Resources. We seek papers that explore new theoretical, methodological, and experimental subjects regarding the optimal utilization of land resources. Policy-oriented papers are also welcomed to present various decision-making processes of land resources from a wide range of backgrounds.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
