

Special Issue

Implementing Innovative and Modern Methods of Construction for Achieving Triple-Bottom-Line of Sustainability

Message from the Guest Editors

This Special Issue aims to develop a holistic understanding of the relationship between the innovative and modern methods of construction and their sustainability performance measured within the TBL framework. Performance assessment of offsite construction, modularization, DfMA, IBS automated, and other innovative construction techniques against the three underpinnings of sustainability—society, economy, and the environment—should be considered critical to minimize the negative implications of built environment development on natural environment and resources. To achieve this aim, this Special Issue invites quality research papers that report practices around the world on how innovative and modern methods of construction can support the achievement of TBL during the development of the built environment in a more measurable manner.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
