Revisiting the Impact of Technological and Organisational Innovation

Message from the Guest Editors

In the context of continuous change and accelerated solutions needed to answer social, economic, environmental, and global societal challenges, innovation is the backbone of progress and one of the possible answers. It is in this context that the assumption is that new technology and organisational concepts generate a new impact, and therefore, the objective of this Special issue is to advance knowledge by revisiting facets of impact in the light of new technologies accompanied by organizational innovations forming the Industry 4.0 paradigm. Further investigation is needed to discover positive, null, and negative impacts, complementarity or substitutive effects, types of impact areas (financial, operational, attitude, behaviour, etc.), impact fluctuation over time, as well as evidence on the spreading and diffusion of concrete tech-org solutions present in organization, a necessary and previous condition for impact generation. For further reading, please visit the [Special Issue website](#).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon
School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
