

Special Issue

Emerging Technologies for Sustainable Transportation Systems

Message from the Guest Editors

This Special Issue is devoted to collecting papers focusing on novel models and methods as the base of emerging technologies for sustainable transportation. We aim to gather significant contributions that cover almost all the research fields and subjects involved in sustainable transportation development and deployment, such as the followings:

- MaaS (Mobility-as-a-Service) and LaaS (Logistics-as-a-Service);
- Intelligent Transportation Systems for shared mobility;
- Automated public transport systems;
- Urban transit network optimization;
- Traffic safety and security;
- Low-emission mobility;
- Energy-efficient freight transportation;
- LUTI models for sustainable urban planning.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
