

## Special Issue

# Sustainability and Technological Trajectories of Erosion

### Message from the Guest Editors

Clearly, technologies are part and parcel of sustainability issues, both as problem and as solution. When the role of technologies is studied, however, the tendency is to focus on the emergence of new socio-technical arrangements. Yet, what about the fate of old technologies that threaten more sustainable modes of production and consumption? What about the ‘trajectories of erosion, decay, and fossilisation’ as Elisabeth Shove and Gordon Walker (2007) coined the reverse dynamics. This Special Issue comprises papers that describe, characterize and analyze the decline and failure of established technologies. In this Special Issue we welcome theoretical, empirical and practical contributions from STS, innovation studies, governance studies, transition studies, history, management studies, and other relevant fields.

- Innovation Dynamics
- Technology and Society
- Sustainability Policy
- Socio-Technical Transitions
- Technological Regime
- Innovation Policy
- Technological Change
- Promising Technologies

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
