

## Special Issue

# Technology, Organisation and Management in Sustainable Construction

### Message from the Guest Editors

Sustainable development has ceased to be a fashionable idea—it is a necessity. This approach requires an interdisciplinary and multi-aspect perspective. In the context of relevant challenges, modern materials and technologies are continuously developed in the sustainable building sector, as are planning, organization, and construction management systems.

This Special Issue will discuss efforts to support sustainable construction, and, in particular, aspects associated with technology, organization, and management in this sector. The subject matter aligned with this question includes the design, construction, modernization, and occupancy of both individual buildings and entire building complexes, as well as the management of smart infrastructure and construction. Sustainable building

Smart infrastructure and construction

Sustainable management

Nearly zero-energy buildings

Indoor air quality

Sustainability materials and technologies

Building materials and structures

Construction processes

Construction economics, cost management

Risk management

---

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

---

### Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario  
Institute of Technology, Oshawa, ON L1G 0C5, Canada

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
