

## Special Issue

# Appropriate Technologies for Sustainable Human Development in International Cooperation

### Message from the Guest Editors

This Special Issue of *Sustainability* explores the state of the art in “appropriate technologies” and presents cutting edge research on new technologies and educational systems that aim to help to achieve the SDGs. It seeks to promote new research in technologies that address the lack of access to basic services in developing countries, to help to integrate technical, political, and social dimensions, and to stress the need for making technology a vehicle for human development. This Special Issue will include a range of research on relevant technologies and infrastructures, such as eco-efficient materials and processes with a low carbon footprint, the use of clean energy, access to water and sanitation infrastructures, ICTs, processes of technological appropriation, training, education, and awareness. We hope to create a platform for new lines of research and to identify critical points in local, national, and international cooperation agendas to help forge a transformative path.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
