

Special Issue

The Social Psychology of Climate Change: New Challenges for a Healthier and More Sustainable World

Message from the Guest Editors

Some potential examples of topics in Special Issue are as follows:

- The analysis of dimensions such as social and environmental vulnerability, urban resilience, mental health, violence and crime, from a psychosocial perspective;
- Psychological barriers that limit climate action;
- Theoretical and methodological contributions from environmental psychology;
- The relationship between security, well-being, and social cohesion with the presence of natural resources as an integral part of urban space, and its relationship with adaptation to climate change and disaster risk;
- The exploration of climate resilience factors that have a key role in helping cities to adapt to climate change
- Reciprocal relationships between people and their natural and built-up environment, with its social, economic, cultural, and environmental concomitances;
- The impact of noise, traffic, and population density, and how this affects social cognition, emotions, and behavior.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
