

## Special Issue

# Strategic Thinking and Innovation in Tourism Sector

### Message from the Guest Editor

Innovation ecosystems are a trending topic in multiple disciplines where traditional, reductionist approaches have proven increasingly inadequate for the problems and opportunities occurring in dynamic, interconnected conditions. Interest in innovation ecosystems in the tourism sector has been particularly robust, establishing tourism as an early adaptor of innovation ecosystems in practice and as a thought leader in scholarship. Innovation ecosystems are an application of complexity science and systems thinking. Tourism is itself a complex adaptive system and has recognized the value of a systems approach. There is active and exciting research on innovation ecosystems in tourism, and we believe that additional theory and research is needed to advance our understanding of this topic. Therefore, the primary purposes of this Special Issue are to consider the state of theory and research on innovation ecosystems in the tourism sector, expand existing theories or offer integrative models of tourism innovation ecosystems and, generally, foster additional scholarship on the topic.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
