

Special Issue

Modern Tools and Techniques for Green Synthesis

Message from the Guest Editor

Since the publication of the twelve principles of green chemistry, when the basis for the development of green methodologies in organic chemistry was set, organic chemists have been developing new strategies, tools, reaction media, and techniques to achieve the green chemistry objectives. New strategies such as multicomponent reactions, cascade or domino catalyzed reactions, jointly with new techniques such as microwave, ultrasound, mechanochemistry, or flow reactions, using green solvents, water, ionic liquids, or eutectic solvents could lead to the ideal process. This Special Issue intends to highlight the improvements that were achieved by the conjugation of new techniques with new strategies and reaction media. While the isolated topics have often been approached in the scientific literature, the potentiality of their combination may originate remarkable improvements in sustainability, which this Special Issue intends to illustrate.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
