

## Special Issue

# Towards Carbon Neutrality: Practices, Patterns and Perspectives

### Message from the Guest Editors

With the adoption of this Climate Neutrality Strategy, the role of agriculture related to process and product innovations under the sustainability paradigm will become crucial. We are moving towards a pattern that reaffirms a shared approach that does not identify development simply with economic growth, but incorporates the pursuit of two other fundamental objectives, environmental protection and social inclusion. Foreseeing the consequences of current choices, while preserving the resources essential to ensure the conditions for development, is, therefore, inherent in the world of agriculture. The choice to analyse sustainability, therefore, appears to be completely in line with its roots, but also deeply embedded in the present and projected into a future that can be truly more sustainable, as a guarantee of life for future generations and the planet in general.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
