

## Special Issue

# Towards Sustainable HRM: Types, Factors, Drivers and Outcomes

### Message from the Guest Editors

Scholarly debate on corporate sustainability has reached a new level with suggestions that companies should focus on contributing to UN sustainable development goals (SDGs). Therefore, the companies are aspiring to embed the sustainability goals into various levels of their strategy, and academic research is increasingly exploring these issues. Although there is a growing body of literature on sustainable accounting, marketing, and retailing, literature on sustainable HRM is relatively diverse and fragmentary. Thus, we know little about how the search by companies to become “more sustainable” impacts HRM or how HRM could effectively contribute to both sustainable HRM systems and reaching SDGs. Therefore, understanding the classification of sustainable HRM types and the design and implementation of sustainable HRM practices is vital for scholars and practitioners. In response to the potential significance of sustainable HRM, this Special Issue aims to offer a thorough exploration of sustainable HRM, its types, factors, drivers and outcomes within diverse industry contexts (production/manufacturing/service) and its implications for corporate sustainability.

### Guest Editors

Dr. Kamal Badar

School of Management, Victoria University of Wellington, Wellington, New Zealand

Dr. Ahmad Siddiquei

Bond Business School, Bond University, Gold Coast, Australia

Dr. Mohammed Aboramadan

Department of Economics, Università degli Studi dell'Insubria, Varese, Italy

### Deadline for manuscript submissions

closed (31 August 2023)

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
