

Special Issue

Sustainability Issues in Transport Pricing

Message from the Guest Editor

This Special Issue focus on sustainability issues in transport pricing (including taxation of transport activities). It is especially interesting to see contributions addressing the potential conflict between different aspects of sustainability (e.g. environmental vs. social impacts) but all contributions addressing pricing and sustainability are welcome. Potential topics include (but are not limited to):

- Optimal pricing of different transport modes
- Environmental effects of different pricing schemes
- Distributional effects and effects on the social inclusion of different pricing schemes
- Effects on the competitiveness of different sectors of different pricing schemes
- Goal conflicts due to the pricing and taxation of transport services
- Comparative analyses of different taxation/pricing regimes and their effects

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
