

Special Issue

Transport Systems for Sustainability: Policy, Planning and Exploitation

Message from the Guest Editors

This Special Issue aims to gather contributions from transport policy and planning to the sustainability of the world. Looking to past decades, several societal changes can be observed. Their consequences have implications for how transport can contribute to the Sustainable Development Goals (SDGs) as defined by the United Nations. The SDGs do not explicitly state that transport is a main contributor to that endeavor; however, this sector is present in all of the 17 SDG goals. Thus, this Special Issue aims to address these issues and collect the output of different high quality studies..

The papers to be included in this issue should reflect policies and measures taken at different decision levels (i.e., strategic decisions, tactical planning, and operational outcomes) and cover passengers and freight, as well as services, infrastructure, and third party providers.

The ultimate goal of this Special Issue is to provide a set of measures, policies, and actions toward sustainability.

We look forward to receiving your papers.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
