

Special Issue

Recent Trends and Applications in Intelligent Systems for Sustainability

Message from the Guest Editor

Sustainability is an essential component of our global society since it can result in social development, environmental protection, and economic development. Intelligent systems can play a significant role in addressing challenging issues and providing optimal solutions to enhance sustainability and sustainable development. In this context, intelligent systems techniques have been widely adopted to achieve the goal of sustainability in different aspects, for example, (1) designing intelligent control and optimization systems for managing complex systems; (2) building intelligent network modelling and predictions systems in the areas of power grids, transportations, and social networks; (3) designing intelligent dynamic systems for data analysis and predictions in the areas of renewable energy generation, climate change, ecosystems, and poverty mapping; and (4) implementing intelligent systems for performance analytics and decision making in the manufacturing sector. About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
