Special Issue

Exploring the Relationship between Urban Form, Mobility and Social Well-Being: Towards an Interdisciplinary Field of Sustainable Urban Planning and Transport Development

Message from the Guest Editors

This Special Issue focuses on exploring the relationship between urban form, mobility, and social wellbeing across neighbourhoods, cities, and regions. There is a growing amount of research examining changes in wellbeing in response to social and spatial interventions and behavioural changes. However, there is a lack of understanding of the different types of wellbeing and the resultant variations in impact. Therefore, there is an urgent need to further explore the relationship between them, as well as to examine the ways in which different types of wellbeing can be measured by applying various advanced models and research approaches.

The Special Issue aims to collect high-standard articles that explore social well-being from the perspectives of urban planning, travel behaviour and mobility. Potential topics include but are not limited to the followings:

- Sustainable urban mobility, travel behaviour, mode choice, and subjective wellbeing;
- Sociospatial analysis, changes in spatial structure and social wellbeing;
- Urban form, land use planning, built environment, and social wellbeing; ...

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
